

# WHY BAMBOO?

**ECO-FRIENDLY**

**ODOR FREE**

**SOFT TOUCH FEELING**

**LUXURIOUS SHINY APPEARANCE**

Viscose made from Bamboo is the one of the newest, most innovative mattress materials. It is a grass that grows quickly, without pesticides, Bamboo is considered one of the most sustainable, renewable resources on the planet.

Viscose made from Bamboo is pesticide free, provides a cooler sleeping surface by taking moisture away from the body. Viscose-Bamboo mattresses are hypoallergenic and create an environment not suited to bacterial growth by removing moisture from the surface of the fiber.

This material is made from a renewable, self-regenerating resource. Soft, silky and shiny, rayon-bamboo fibres make the fabric very luxurious. This material breathes naturally and it absorbs moisture to help regulate temperature.

The best advantage a Viscose-Bamboo mattress has over others is its naturally healthy, cooler sleeping surface.
