

SIX BENEFITS OF LATEX

(1) TEMPERATURE

-The open cell structure of Latex, combined with a manufactured pinhole pattern, creates a highly breathable material specially designed to keep you cool.

(2) MOTION

-Latex won't transfer the motion caused by a restless partner, keeping you sound asleep.

(3) NATURAL BENEFITS

-Naturally resists dust mites, mildew, and mold.

COMFORT (4)

-Latex provides superior support while contouring to the unique shape of your body.

CONTINUOUS PROCESS (5)

-Created using a single pour mold, Continuous Comfort™ latex provides a more dense and consistent feel throughout the entire sleep surface when compared to traditional latex.

Oeko-TEX CERTIFIED (6)

-Latex core excels in elasticity and durability, and is free harmful chemicals.
